Are lightning protection systems NFPA 780 standard?

Lightning Protection Systems are not only one of the most expensive infrastructure components of a building, but is also one of the least understood. In the United States, most industry and the government facilities are protected by NFPA 780 Standard for the Installation of Lightning Protection Systems.

How does NFPA 780-2020 protect people from lightning?

Of course, during thunderstorms, many people seek shelter. Unsurprisingly, buildings and other structures are more likely to be struck. To safeguard people and property from lightning-related hazards, NFPA 780-2020 standardizes the installation of lightning protection systems.

What are NFPA standards?

Standard for the Installation of Lightning Protection Systems 2020 NFPA codes, standards, recommended practices, and guides ("NFPA Standards"), of which the document contained herein is one, are developed through a consensus standards development

What is a complete lightning protection system?

The ultimate goal is safe haven, security of investment, and elimination of potential system downtime in opposition to one of nature's most destructive events. The Standards in the United States for complete lightning protection systems include NFPA 780, UL 96 & 96A, and LPI 175 & 177.

Jun 23, 2025 • Install lightning rods, grounding, surge protectors, shielding, and follow standards for effective communication station protection.
