-----  
Is large-scale energy storage a viable option in the Middle East?

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy projects expanding across the region, energy storage has started gaining traction.

Is energy storage gaining traction in the Middle East?

With renewable energy projects expanding across the region, energy storage has started gaining traction. Unlike Europe, North America, and Asia, where renewable energy and storage technologies are well-established, the Middle East remains in the early stages of development.

Should a MENA energy storage alliance be established?

A report by Arab Petroleum Investments Corporation recommends establishing a MENA Energy Storage Alliance, supported by public-private partnerships, and offering financial incentives like tax benefits and green financing to attract private sector investments.

How many solar panels are installed in the MENA region?

MENA Energy outlook 2025<sup>9</sup> The current installed solar PV capacity amounts to 22.3 GW in the MENA region (Figure 4). The UAE are leading the way with more than 5 GW installed.

Both schemes will also have a positive impact on the Middle East's localisation plans, by creating opportunities for manufacturing and installing solar cells for small and medium enterprises.

The Middle East's journey towards energy diversification and sustainability is a story of vision, innovation, and collaboration. Energy storage solutions are at the heart of this ...

Speakers will examine various storage technologies, from long-duration batteries to advanced grid-scale
