-----  
How many batteries can you take on a plane in 2022?

AvSec removed more than 190,000 batteries from passengers' carry-on and checked-in luggage in 2022. Make sure your batteries leave the airport with you, and check the restrictions before you travel. Batteries must be protected by packaging or terminals covered. Each person is allowed a total of 20 spare batteries.

How many spare batteries can you take on a plane?

Up to two of your spare batteries can be between 100-160Wh, or 2-8g of lithium. You cannot bring batteries rated higher than 160Wh or 8g of lithium. You must pack your spare batteries in your carry-on bags. They are not allowed in your checked-in baggage. What types of batteries count toward my spare battery limit?

Can I carry a battery on a domestic flight?

Airlines now have strict rules around the capacity and storage of batteries loaded in carry-on or hold luggage for domestic flights. Some of our customers have experienced confiscation of batteries that are not properly declared or packaged for flight or have more capacity than is allowed.

Can you recycle lithium batteries in New Zealand?

Lithium is a newer technology; however, New Zealand's recycling industry is now putting new facilities in place for the recycling of lithium batteries. Choosing the most appropriate solar PV system for your needs can be challenging.
