-----  
Which solar projects are included in the New Zealand solar Bill?

UK-based developer Harmony Energy has three projects included in the bill: the Hinuera Solar Farm in Waikato, the 26MW Bunnythorpe Solar Farm in Manawatu-Whanganui, and the Huirangi Solar Farm in Taranaki, on the western side of New Zealand's North Island.

How much energy will New Zealand's solar and wind projects generate?

Together, the solar and wind projects could add nearly four times as much generation as the Clyde Dam - New Zealand's third-largest hydroelectric plant - with the wind projects generating 300Mw, 80Mw and 39Mw at peak output respectively and the solar farms adding up to 1147Mw.

How many solar projects are there in New Zealand?

Of these projects, 22 are dedicated to renewable energy, with 10 focusing specifically on solar PV. The list includes several large-scale developments, such as the 420MW Point Solar Farm on New Zealand's South Island. Also fast-tracked in the Canterbury region are the 88MW Balmoral Station solar array and the Black Point solar plant.

How many large-scale solar farms are in New Zealand?

Ten large-scale solar farms planned for New Zealand's North and South islands are among 22 renewable energy projects with a combined capacity of 3 GW that have been listed for inclusion in the government's "one-stop shop" fast-track approvals process. From pv magazine Australia

If New Zealand vigorously promotes small wind turbines, it will contribute to the rapid development of New Zealand's wind power generation. Small-scale wind farms will also ...
