Who makes the most energy storage cell shipments non-China?

The top three manufacturers in energy storage cell shipments non-China markets were CATL, BYD, and CALB. At present, most non-China cell shipments from Chinese-funded manufacturers are achieved through the commissioning of non-China energy storage projects by leading Chinese system integrators.

How much did energy storage cost in China in 2023?

The global energy storage market nearly tripled in 2023 alone, adding 45 gigawatts (97 gigawatt-hours), yet prices in China fell to record lows of \$115 per kilowatt-hour for two-hour systems--a 43% year-over-year decrease.

How did storage cell shipments perform in 1H25?

In 1H25, global small-scale storage cell shipments reached 21.64 GWh, up 72.38% YoY. In 2Q25 alone, shipments exceeded 10 GWh -- the highest single-quarter delivery in nearly three years -- driven mainly by downstream restocking and a shipment surge in the Australian market.

What are the key trends in energy storage cell shipments?

CATL and Hithium ranked as the top two in global energy storage cell shipments. Key market themes include (1) full capacity and full sales; (2) tiered differentiation; (3) emerging players; and (4) capacity buildup. \*InfoLink strives for information comprehensiveness, but manufacturers' official data shall prevail in case of any discrepancies.

## 2. Current Situation of China's Energy Storage Exports: Scale, Structure, and Regional Distribution 2.1 Export Scale and Product Structure Overall Growth: In 2023, the export value ...
