What is North American Solar Academy?

Knowledge and Skill Development is the First Step. North American Solar Academy's mission is to deliver the highest quality education in Solar PV Design and Installation. Our program is divided into two components; a two-day hands-on program and an online e-learning which is a separate course that prepares you to write the NABCEP Associates exam.

Who is ENGIE in the solar industry?

ENGIE is an innovative provider of competitive solar energy solutions with a customer focus across North America. We're building and operating grid-scale solar projects throughout North America that produce electricity for the grid.

Who is solar design & installation training?

We are an Ontario Based Company that has been providing Solar Design and Installation training since 2015. NASA (North American Solar Academy) has the unique ability to deliver the training to all locations across North America; in other words, the course comes to you.

Does NASA offer a solar training course?

NASA (North American Solar Academy) has the unique ability to deliver the training to all locations across North America; in other words, the course comes to you. The training puts a priority on hands-on learning as well as understanding the technical side of Solar Design and Installation.

Hanwha Solutions Qcells Division is a complete energy solutions provider operating worldwide. With cutting-edge technology and excellent quality, ...

Learn what solar engineering is, where to work and how to become a solar engineer. Discover education requirements and careers for solar energy engineers.
