-----  
How is North Macedonia transforming its energy sector?

North Macedonia's energy sector is transitioning towards cleaner and more efficient solutions. While lignite remains a primary energy source, the country is significantly increasing investments in renewables, including: Hydropower - A well-established sector with untapped potential for small and large-scale projects.

Is North Macedonia a state-owned power company?

North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s. Austrian utility company EVN has been responsible for electricity distribution in North Macedonia since entering the market in 2006.

What role does North Macedonia play in regional energy networks?

North Macedonia plays a crucial role in regional energy networks, with: Interconnections with Greece, Albania, Bulgaria, and Serbia - Strengthening energy security and market integration. Gasification Projects - Expanding natural gas infrastructure to reduce dependency on coal.

How many power plants are there in North Macedonia?

The electric power production system in North Macedonia consists of two coal power plants with a total installed capacity of 825 megawatts (MW), several hydro power plants with a total installed capacity of 695 MW, one combined generation power plant, a heavy oil plant, solar power plants, a few biogas plants, and two wind power farms.
