Why did Northern Lights expand CO2 transport & storage services?

"The decision to expand our CO2 transport and storage services represents the next step in building a commercially viable CCS market in Europe. It confirms Northern Lights' commitment to offer an effective solution for companies to reduce emissions.

Who owns Northern Lights?

Located in Norway, Northern Lights is the world's first CO2 transport and storage project open to industry, owned equally by TotalEnergies, Equinor and Shell. Operational since 2024, the first phase of the project can store up to 1.5 million tonnes of CO2 per year.

Is northern lights ready to receive CO2 from 2024?

Ready to receive CO 2 from 2024, Northern Lights is the first company to offer commercial CCS services. The first phase of Northern Lights is part of Longship, the Norwegian Government's full-scale carbon capture and storage project.

What is Northern Lights?

The first phase of Northern Lights is part of Longship, the Norwegian Government's full-scale carbon capture and storage project. Northern Lights will transport and store CO 2 from two Norwegian industries; Heidelberg Materials' cement factory in Brevik and the Hafslund Celsio' waste-to-energy plant in Oslo.

3 days ago · Located in Norway, Northern Lights is the world's first CO2 transport and storage project open to industry, owned equally by TotalEnergies, Equinor and Shell. Operational ...

May 1, 2024 · SSE Renewables has acquired a fully consented 100MW / 200MWh battery storage project near Dungannon, County Tyrone, ...

1 day ago · This will start once the Northern Lights 2 carbon capture and storage facility

becomes operational in 2028. The Northern Lights CCS 2 project also secured EUR 131 million (\$141 ...

1 December 2025 Fortescue delivers first large scale BYD Battery Energy Storage System to North Star Junction Fortescue has delivered its first-ever large-scale Battery Energy Storage ...
