How much does an off grid solar system cost in Australia?

But before you take the leap, understanding the Off Grid Solar System Cost is crucial. The average Off Grid Solar System Cost in Australia ranges between \$25,000 and \$60,000 in 2025, depending on household size and energy requirements. Here's a quick cost breakdown:

Are off-grid solar systems a viable option in Australia?

As the world continues prioritising sustainability and renewable energy sources, off-grid solar systems have emerged as an attractive option for homeowners and businesses in Australia. These systems allow consumers to independently generate clean, renewable energy, reducing reliance on traditional fossil fuels and power grid networks.

How much does an off-grid solar system cost?

However, off-grid solar systems are generally more expensive than grid-tied systems. How much does an off-grid solar system cost in 2025? According to our Energy Matters team, the average cost of an off-grid solar system for a two--to three-person home is around \$20,000--\$35,000. The greatest expense is the battery.

What is an off-grid Solar System?

Off grid, standalone, or autonomous solar systems are self-contained power systems that do not rely on the centralised electrical grid. Instead, solar panels harness energy from the sun through photovoltaic (PV) panels, store it in batteries, and use inverters to convert it into usable electricity.

RedEarth has a range of Australian-made, on-grid, off-grid, and hybrid energy storage systems. Plus, our energy storage systems are scalable, so you can be confident you're getting a ...

In 2025, Australia is experiencing explosive growth in solar and energy storage. This guide comprehensively analyzes off-grid battery systems in Australia, the best solar batteries in ...
