What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) |Schneider Electric Hong Kong,China. An Uninterruptible Power Supply system provides emergency power when the main source fails,using batteries to ensure a continuous supply. It conditions incoming power,protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

Are battery-backed uninterruptible power supplies reliable?

Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptible power supplies (UPS) are one option to protect and keep electronic equipment operating in the event of grid power failure.

Does uninterruptible power supply USP provide surge protection?

Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics. So,your battery backup is always at work,protecting your desktop computer,network equipment,or other electronic equipment and charging its battery when not in use.

Is a ups a primary surge protection device?

A UPS delivers second-level protection against surges; it should never be considered a primary surge protection device. It also continually regulates incoming voltage and provides an internal battery that allows connected equipment to continue running even if the power supply is cut.

3 Phase UPS power protection, solving today's energy challenges while setting the standard for quality and innovation with fully integrated solutions for enterprise-wide networks, data ...
