What is Poland doing about energy storage?

Poland has just rolled out one of Europe's most ambitious energy storage programmes- a EUR980 million initiative that's set to transform the country's grid infrastructure. The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage capacity by 2028.

Why is energy storage subsidy important in Poland?

Energy storage subsidy programs are crucial to stabilizing Poland's electricity grid. An increase in the number of storage installations affects the flexibility and reliability of the power system. Balancing energy supply and demand. Reducing the load on the grid during peak hours. Integration of renewable energy sources (RES).

What is Poland's new energy storage scheme?

The scheme has been brewing since 2024, with the final regulation published in the Journal of Laws of the Republic of Poland in March this year. It received European Commission approval, which authorised state aid of EUR1.2 billion in state aid to support at least 5.4 GWh of new electricity storage facilities.

Where is the largest battery storage facility in Poland?

Meanwhile, DRI, the EU renewables arm of Ukraine-based energy investor DTEK, has completed the acquisition of a 133 MW/532 MWh battery storage project in Trzebinia, Poland, from developer Columbus Energy. "This marks a significant advancement in developing the largest battery storage facility in Poland," DRI said on Wednesday.

The funding call "Electricity storage facilities and related infrastructure to improve the stability of the Polish power grid" was launched by the environment ministry in the spring. ...
