What is a home back up power system?

A home back up power system stores energy for when you need it most, like during power cut. Battery solutions like our portable power stations provide your gadgets and appliances with clean and reliable juice until your main power supply comes back.

Why should you buy a portable power station?

Stay powered anytime, anywhere with our premium collection of portable power stations. Whether you're going off-grid, camping, or preparing for an emergency, our high-capacity solar and lithium power stations keep your essentials running.

Are power stations a good backup generator?

The bigger and more expensive power stations are designed as emergency backup generators for your house. That's because they have larger capacity batteries and higher power output. So, they can support appliances like your fridge, freezer, oven, or microwave until your main power supply is restored.

Do you need backup power?

Especially for people who rely on mains power for medical reasons, or for people who have pets that need a constant source of electricity, backup power will be a serious consideration. And the good news is, it needn't cost as much as you might fear.

Whether you want to charge your EV in the city, go off-grid in the North West countryside but stay connected, or want peace of mind back up power at home to be prepared for any power ...
