What is an uninterrupted power supply (UPS)?

An uninterrupted, or uninterruptible power supply (UPS) works as a battery, surge protector and power inverter for household and office electronics. The battery inverter allows stored energy to be used for power, while the surge protector prevents any damage from a sudden surge in the power level.

What are UPS modules with capacitor storage?

UPS modules with capacitor storage are equipped with integrated electrochemical double layer capacitors. In case of a power fault they guarantee an uninterrupted power supply for several seconds. By using such UPS modules, processes can be completed and data saved, for instance.

What is a Puls 24 V UPS?

PULS 24 V UPS modules have an optimized battery management system for longest possible battery life. The uninterruptible power supplies have e.g. an adjustable maximum buffer time to protect the battery and the unit protects the battery from going into a deep discharge.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and revenue.

Shop Staples" collection of battery backups and uninterruptible power supplies (UPS) to protect your data and technology.

In Pristina, where power stability remains a critical concern for businesses and households alike, uninterruptible power supplies (UPS) have become indispensable. Whether you're running a ...
