What is an IP66 electrical enclosure?

IP66 electrical enclosures are equivalent to NEMA 4 and NEMA 4X enclosures. International Protection(IP) standards are used to designate the protective capacity of an electrical enclosure. The two-digit code shows the protection against particles (the first digit) and water (the second digit).

What are the features of IP66 cabinets?

Features of our IP66 cabinets include: - Complete protection from solid objects of any kind. - High pressure jets from all directions,(limited ingress permitted). - Enclosure can be hosed down, eg. Ship decks. Often called rain tight enclosures due to their excellent weather resistance.

What are the benefits of IP67 & IP66 enclosures?

They also provide complete protection against: IP67 enclosures fully protect electronics and electrical components against dust. They are also effective at protecting against water damage during a temporary 30-minute immersion at a depth of between 15cm and 1m. Our IP66 enclosures offer protection as high as that of level 4 custom NEMA enclosures.

What is the difference between IP67 and IP66 enclosures?

IP67 enclosures fully protect electronics and electrical components against dust. They are also effective at protecting against water damage during a temporary 30-minute immersion at a depth of between 15cm and 1m. Our IP66 enclosures offer protection as high as that of level 4 custom NEMA enclosures. They provide a complete shield against:
