What is the current state of solar energy in North Macedonia?

This article explores the current state of solar energy in North Macedonia, the opportunities for growth, and the challenges that must be addressed to maximize its potential. By the end of 2022, the country had reached a photovoltaic capacity of approximately 144 MW, with projections indicating rapid growth in the coming years.

How much is a solar power plant worth in Macedonia?

An estimated value of 70 million euros. Novaci Solar Power Plant: A 100 MW facility completed by Mey Energy. North Macedonia enjoys high solar irradiation (1,200 kWh/kWp/year) and abundant degraded land, giving it an estimated technical potential of approximately 100 GW.

How much solar power does Macedonia have in 2022?

By the end of 2022, the country had reached a photovoltaic capacity of approximately 144 MW, with projections indicating rapid growth in the coming years. In 2023 alone, North Macedonia saw an impressive increase in solar capacity, with new installations contributing to a total increase of 251% compared to the previous year.

Is Macedonia a leader in the Western Balkans' energy transition?

Yes. According to a report by RateWW, North Macedonia has accelerated its shift towards renewable energy in recent years, emerging as a regional leader in the Western Balkans' energy transition. By 2023, renewables accounted for 50% of the country's installed power capacity and are projected to reach 70% by 2025.

Jun 24, 2025 – This report provides a comprehensive update on North Macedonia's renewable energy sector for foreign developers and investors. It covers the current landscape across ...

North Macedonia is rapidly adopting renewable energy solutions, and energy storage systems (ESS) are becoming critical for stabilizing the grid and reducing reliance on fossil fuels. This ...
