How much does a Bess system cost?

As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. Key Factors Influencing BESS Prices

How much Bess capacity has South Africa secured?

South Africa has secured nearly 1.7GW/11GWh of grid-scale BESS capacity via various procurement programmes.

What is the largest Bess project in South Africa?

Scatec's Kenhardt BESS project, the largest online in South Africa. Image: Scatec. The government of South Africa has secured nearly 1.7GW/11GWh of grid-scale BESS capacity via various procurement programmes, though questions have been raised around their integrity and deliverability.

How will Eskom support the energy grid in 2027/28?

Winning projects receive a Net Dependable Capacity Payment per MW/hour and a Net Energy Payment per MW/h, and need to be online by 2027/28. Eskom will use the projects' capacity to balance and support the grid, predominantly via ancillary services like Instantaneous Reserves, Regulating Reserves, Ten Reserves and Supplemental Reserves.
