Why are batteries so important in the Netherlands?

Batteries are indispensable for the energy transition. Yet the development of battery projects in the Netherlands lags behind that in other countries. This is because batteries in the Netherlands have to pay to take power from the grid.

Who is responsible for battery development in the Netherlands?

Enecogen is responsible for maintenance and operations. The EP NL and Eneco trading departments control the battery. Batteries are indispensable and acceleration is necessary. Batteries are indispensable for the energy transition. Yet the development of battery projects in the Netherlands lags behind that in other countries.

Who is Lithium Werks?

Lithium Werks provides cells, custom battery packs, and battery management systems into markets such as stationary energy storage, industrial, commercial marine, and transportation. Using patented technology, Lithium Werks focuses on long-term partnerships with our clients to provide powerful, inherently safe and reliable battery systems.

What is EP NL & Eneco doing at Europoort?

15.7.2025 EP NL and Eneco are realising a large-scale battery project at Enecogen's Europoort power plant, in which both parties hold a 50% stake. The battery will have a connection capacity of 50 MW and an energy storage capacity of 200 MWh, enabling it to supply electricity for four hours.
