Should schools install solar panels off-site?

For large educational institutions that house thousands of students and provide offices for faculty, installing off-site is the best way to build a solar array that can generate power to meet a significant portion of electricity needs.

Are solar-powered schools a good idea?

The Solar Foundation's report on solar-powered schools revealed that, of the 125,000 K-12 schools in the U.S., some 72,000 of them would likely see economic benefits from installing a solar system.

Should a school have a solar array on a rooftop?

A massive solar array on a school's rooftop is an easy way to develop a green power brand and offer an edge for students trying to decide between two colleges of similar appeal.

Should schools install solar panels?

For schools considering installing solar panels, the reality is that any big educational institution will have major utility costs. Various analyses, such as our latest Marketplace Intel Report, revealed that larger solar systems earn more ROI. Thus, big entities like schools stand to save the most with solar.
