What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) are essential to ensure you have continuous power during a power outage. From a small UPS to save and shut down your PC, to large commercial systems that power large data centers or critical systems in hospitals, we have the solutions you and your customers demand.

What is ups power protection?

First class power protection for critical infrastructure. Highly efficient 160 -1125kVA -480V and 160 -1000kVA 400V 3 phase UPS power protection that seamlessly integrates into medium data centers, industrial or facilities applications. Trusted partner for your business continuity

What are UPS modules with capacitor storage?

UPS modules with capacitor storage are equipped with integrated electrochemical double layer capacitors. In case of a power fault they guarantee an uninterrupted power supply for several seconds. By using such UPS modules, processes can be completed and data saved, for instance.

What is UPS battery backup?

During an outage, that small UPS Battery Backup under your desk at work gives you enough time to save your spreadsheet and properly shut down your computer. For data centers, a massive, 8-ton UPS Battery Backup affords operators a chance to bring on backup generators during a power outage.
