Where will solar power be installed in Serbia?

The Ministry of Mining and Energy and EPS (Elektroprivreda Srbije) partnered with Hyundai Engineering and UGT Renewables to drive this project. Serbia will soon see six large solar plants strategically positioned across the country. Key locations include Negotin, Zajecar, and Bosnjace.

What does a solar project mean for Serbia?

For Serbia, this project means more than just meeting renewable energy goals. It promises energy independence, economic stability, and a sustainable energy supply. By creating a network of self-balancing solar plants, Serbia strengthens its energy security, attracts green investments, and aligns with global environmental standards.

Why should Serbia invest in solar power plants?

Located throughout the country, these solar power plants will help Serbia improve energy security, avoid expensive energy imports, and achieve electricity independence at an affordable price. The modernization of the EPS and renewing Serbia's Energy Generation Portfolio will have a lasting impact on communities throughout Serbia.

How many MW of battery storage will be developed in Serbia?

Up to 200 MW of battery storage will be developed across the sites. Image: Ministry of Mining and Energy, Tanjug Plans for 1 GW of new solar in Serbia are set to go ahead after the signing of an implementation agreement.

Turkish renewable energy company Fortis Energy has announced plans to construct a 110 MW solar power plant near the town of Sid in northwestern Serbia. The Erdevik solar project will ...
