

Due to the intermittent nature of solar energy, it has been increasingly challenging for the utilities, third-parties, and government agencies to ...

Jan 15, 2024 · ;This paper proposes a novel methodology that combines Geographic Information System-based fuzzy Technique for Order of Preference by Similarity to Ideal Solution ...

Jan 3, 2022 · ;To the best of our knowledge, no study has addressed the subject of optimal solar plant site identification for the Al-Qassim region, although developing renewable energy in ...

Jan 3, 2022 · ;To the best of our knowledge, no study has addressed the subject of optimal solar plant site identification for the Al-Qassim region, ...

May 21, 2024 · ;Optimal location identification The success of solar and wind energy projects largely depends on their location. Esri GIS helps in analyzing key factors such as land use, ...

Jun 26, 2024 · ;In Turkey, electricity produced from solar energy systems plays a key role in supplying energy demands because the geographic location of Turkey is suitable to benefit ...

Jun 17, 2024 · ;Among renewable energy sources, solar energy is quickly becoming popular because it is inexhaustible, clean and reliable. It has also become more efficient as the energy ...

Jun 26, 2024 · ;In Turkey, electricity produced from solar energy systems plays a key role in supplying energy demands because the geographic ...

Dec 9, 2023 · ;Accurate identification of solar photovoltaic (PV) rooftop installations is crucial for renewable energy planning and resource assessment. This paper presents a novel approach ...

Due to the intermittent nature of solar energy, it has been increasingly challenging for the utilities, third-parties, and government agencies to integrate distributed energy resources generated by ...

Nov 30, 2025 · ;The precise identification of photovoltaic power stations is essential for advancing the assessment of energy infrastructure and for the efficient management of land resources. ...
