How do I safely use lithium-ion batteries?

Read and follow the guidelines in this document to safely use Lithium-Ion batteries and achieve the maximum battery life span. Do not leave batteries unused for extended periods of time, either in the product or in storage. When a battery has been unused for 6 months, check the charge status and charge or dispose of the battery as appropriate.

Are lithium-ion rechargeable batteries safe?

Lithium-Ion rechargeable batteries require routine maintenance and care in their use and handling. Read and follow the guidelines in this document to safely use Lithium-Ion batteries and achieve the maximum battery life span. Do not leave batteries unused for extended periods of time, either in the product or in storage.

How do you store a lithium ion battery?

Charge the battery to approximately 50% of capacity at least once every six months. Remove the battery and store it separately from the product. Store the battery at temperatures between 5 °C and 20 °C (41 °F and 68 °F). NOTE. The battery self-discharges during storage. Higher temperatures (above 20 °C or 68 °F) reduce the battery storage life.

Can I transport a lithium-ion battery?

Seek medical attention. Always check all applicable local, national, and international regulations before transporting a Lithium-Ion battery. Transporting an end-of-life, damaged, or recalled battery may, in certain cases, be specifically limited or prohibited.

As one of the most professional Lithium Ion Battery 51.2V 100ah 5kwh Power Wall For Home Solar System manufacturers and suppliers in China, we're featured by quality products and ...

A solar battery cabinet is a critical component in any solar energy system, serving as a secure and controlled
