Who makes a battery in Poland?

In fact, major industry players such as LG Energy Solutions and Umicore, have established a strong presence there. According to a McKinsey report, the Polish nation ranks second globally in battery production capacity, following China, with 73 GWh in 2022.

Why is Poland a good place to build a battery?

According to Krzysztof Burda, president of the Polish Chamber of Electromobility Development (PIRE), Poland's strategic location makes it "an ideal hub for battery, components, and subassembly factories". In fact, major industry players such as LG Energy Solutions and Umicore, have established a strong presence there.

Why is Poland becoming a magnet for battery factories?

Poland is rapidly becoming a magnet for investments in battery factories thanks to its skilled workforce and government programmes promoting electromobility. Which companies are driving this transformation and what is their impact on the industry?

Why is Poland a key player in the battery industry?

Poland has become a key player in the global battery industry, becoming the country with highest battery production in Europe. As the demand for lithium-ion batteries is getting higher over time, Poland has positioned itself as a major production hub for sustainable energy solutions in the world.

Jan 25, 2024 · SMA Magnetics, the Polish subsidiary of the Hessian inverter manufacturer SMA, is building a new production facility in Krakow. This is the second plant that SMA has built in ...
