What is eco-EMS?

The ECO-EMS series of products is an integrated energy management system designed for energy storage application scenarios... The development of the new energy market has driven the development of the energy storage industry. Many industrial parks have begun to gradually invest in energy storage systems to achieve efficient energy utilization.

What is an Energy Management System (EMS)?

Energy management systems (EMSs) are required to utilize energy storage effectively and safely as a flexible grid asset that can provide multiple grid services. An EMS needs to be able to accommodate a variety of use cases and regulatory environments. 1. Introduction

What is eco PCs?

The ECO-PCS series product is a modular converter designed specifically for small-sized energy storage systems. It serves as a bidirectional energy converter... The energy storage BMS solution supports two modes: a three-level architecture (BMU sub-control module +BCU main control module +BSU master control module)...

What is EMS & how does it work?

The objective of the EMS is to shift and shave the electricity usage of consumers by charging and discharging the ESS to minimize their bills . The savings often come from demand charge reduction, time-of-use (TOU) energy charge reduction, and utilization of net-metering energy.
