What is a solar curtain wall?

Commercial applications are most often designed, engineered, and installed by Solar as storefronts. The curtain wall can be utilized on virtually any type of business. A system can be added to the exterior of your building or utilized for interior divisions between departments or as office walls.

Can curtain walls be used in commercial buildings?

Curtain walls have been used in commercial buildings, especially in New York City and New Jersey, for a long time. Placing a curtain wall on the exterior of these buildings is now a common practice.

Are glass curtain walls energy efficient?

Glass curtain walls are energy efficient as they help natural light enter buildings. They use specially glazed glass, providing an esthetically pleasing exterior or interior for your office building. The use of natural light reduces the need for artificial lighting, making glass curtain walls an energy-saving solution for commercial buildings. Curtain walls have been used in commercial buildings for a long time, especially in New York City.

What is a curtain wall system?

The Curtain Wall System is a thermally enhanced aluminum tubular glazing system for commercial and residential applications. Curtain walls are an excellent way to bring natural light into a room while remaining protected from the elements.
