What is Tata Power's 100 MW battery energy storage system?

Tata Power will install a 100 MW battery energy storage system to facilitate peak load management in Mumbai's power network. It will implement the system across ten strategically located sites in Mumbai, centrally monitored and controlled from its power system control center.

Does Tata Power have a battery storage system?

Battery racks at a Tata Power BESS project. Image: Tata Power. Electric utility and generation company Tata Power has received regulatory approval to deploy a centrally controlled battery storage system in Mumbai, India.

Where will Tata Power's storage capacity be distributed?

While the company described the project as one system, the storage capacity will be distributed across 10 sites near load centres in India's largest city. It will be centrally monitored and controlled from Tata Power's Power System Control Center (PSCC) in Mumbai, which has operated as a load dispatch centre since 1950.

How much battery energy storage capacity will India have in 2025?

Tendering of battery energy storage systems (BESS) capacity has risen dramatically, from 4GWh in 2023 to 60GWh in 2025, according to the India Energy Storage Alliance's (IESA) 2025 annual report on BESS.

The solar energy battery cabinet was designed for battery installations, due to a cabinet of this design's scarce availability that was suitable for a variety of lithium-ion batteries.

It's based on the original cabinet design, stacked with solar energy storage lithium battery 1280wh~2560wh, and built in battery protection system, fully retain the use of load power in ...

Discover how Mumbai's industries and households are slashing energy bills while embracing renewable
