Why did Longi delay the start of a 15-gigawatt solar module factory?

(Bloomberg) -- Longi Green Energy Technology Co. delayed the start of a 15-gigawatt solar module factory in eastern China by 18 months as the sector faces overcapacity and a fierce price war. The project in the city of Wuhu in Anhui province is now expected to be operational in June 2026, the company said in a filing on Tuesday.

Why is Meyer Burger threatening to shut down a solar system?

Companies such as Meyer Burger are threatening to close down module production. They are calling for resilience bonuses, among other incentives. Solar power is all the rage. Global photovoltaic installations rose by 58 per cent to 413 gigawatts (GW) in 2023, in Europe by 40 per cent to 56 GW.

What happened to REC Solar Norway?

REC Solar Norway, the second most important European manufacturer of solar silicon (after Wacker Chemie/D), ceased production in November 2023. The EU heads of state and government have repeatedly pledged to strengthen the domestic PV industry. Such a strong dependence on China in such an important industry of the future is too dangerous.

How many solar panels will the world need in 2024?

There's currently enough capacity to build more than 1,100 gigawatts of panels a year -- nearly double what the world is expected to have installed in 2024 and more than it's going to need as far out as 2035, according to BloombergNEF forecasts. ©2024 Bloomberg L.P.

Dec 11, 2024 (Bloomberg) -- Longi Green Energy Technology Co. delayed the start of a 15-gigawatt solar module factory in eastern China by 18 months as the sector faces overcapacity ...

5 days ago (Bloomberg) -- The global shift toward solar photovoltaic (PV) and wind power is crucial to climate mitigation, yet climate change may intensify extreme low-production (ELP) events and affect ...

Mar 6, 2024&ensp;&#0183;&ensp;In mid-January 2024, Meyer Burger threatened to close Germany"s largest solar module production facility (650 megawatts) in ...

Jan 19, 2024&ensp;&#0183;&ensp;Germany"s last solar module plant - and the largest in Europe - is preparing to close, as the glut of China panels makes business unsustainable.

Jan 31, 2024&ensp;&#0183;&ensp;This comes after Meyer Burger announced plans to abandon its component plant in Germany. The European Solar Manufacturing Council (ESMC) has once again called for ...

Dec 13, 2024&ensp;&#0183;&ensp;Smaller solar manufacturers have been shuttering production lines, but not at a pace fast enough to return profit margins to healthy ...

Sep 30, 2024&ensp;&#0183;&ensp;Most Chinese solar suppliers with production capacity in the four Southeast Asian countries under investigation (Cambodia, Malaysia, Thailand, and Vietnam) have stopped ...

Sep 30, 2024&ensp;&#0183;&ensp;Most Chinese solar suppliers with production capacity in the four Southeast Asian countries under investigation (Cambodia, Malaysia, ...

Dec 13, 2024&ensp;&#0183;&ensp;Smaller solar manufacturers have been shuttering production lines, but not at a pace fast enough to return profit margins to healthy territory. InfoLink"s Amy Fang considers ...

Mar 6, 2024&ensp;&#0183;&ensp;In mid-January 2024, Meyer Burger threatened to close Germany"s largest solar module production facility (650 megawatts) in Freiberg, Saxony/Germany, in April if politicians ...

(Yicai) Dec. 9 -- More than 30 firms representing 90 percent of China"s photovoltaic production have signed a voluntary agreement to cut output as part of a wider effort to stabilize the ...

Aug 8, 2025&ensp;&#0183;&ensp;China has decided to curb production capacity for polysilicon, the key raw material used in solar panels. After years of chronic overproduction that have disrupted the market ...

(Yicai) Dec. 9 -- More than 30 firms representing 90 percent of China"s photovoltaic production have signed a voluntary agreement to cut output ...

Jan 19, 2024&ensp;&#0183;&ensp;Germany"s last solar module plant - and the largest in Europe - is preparing to close, as the glut of China panels makes business ...

Apr 22, 2024&ensp;&#0183;&ensp;In order to reduce the loss and overall risks from the unstable or downward trend of the photovoltaic solar market, these solar cell production lines have been stopped from 14
