How much do solar panels cost?

This means most full-size systems of between 20 and 30 panels cost between \$24,000 and \$36,000. In this guide, we break down everything you need to know, from the average cost of solar panels and installation to the factors that affect pricing and potential savings over time.

How much does a commercial solar system cost?

Costs vary by region, installer, and complexity. For commercial buildings, solar panels average \$2.00 per watt, with a 100 kW system potentially offsetting the entire electricity bill. The initial cost for commercial solar setups is around \$200,000 before incentives.

How much does a 6-8 kW solar system cost?

Typically, a 6-8 kW system--suitable for an average 2,000-square-foot home--will cost between \$15,000 and \$22,500 before applying any incentives. However, after applying the 30% federal solar tax credit, the cost can drop significantly to between \$10,500 and \$15,750.

How much does a home solar system cost?

Factors like local economic conditions, installation methods, and energy policies all play a role in these price differences. Nationally, the cost of a home solar system is expected to fall between \$24,000 and \$36,000, with average costs hovering around \$3 per watt before incentives. Here's a snapshot of costs by state:
