What type of glass is used in a sunroom?

The glass used in the sunroom can be any industry available glass. Laminated glass is typically used in the roof. Upon impact, such as a falling tree, the glass will crack but should not break, leak, or fall on a bystander. LowE glazings can be used in the roof and walls. This is a very sensible glass for home owners.

Can a sunroom be a retractable roof?

where you can see the beauty of every season through the glass of your Sunroom. The glass roof can be stationary or retractable. The Sunroom is a watertight system that can protect you from harsh weather. "Our guests love it. The skylight extension has become the favorite part of the event venue." Other RAL colors and wood finishes are available...

What is an aluminum sunroom?

All sunrooms are constructed from durable aluminum frames. An aluminum sunroom will not rust, warp, rot, or require constant finishing maintenance. The framework will withstand snowstorms in Montana and extreme temperatures in New Mexico. Snow loads, wind loads, and hurricane requirements can typically be met by our in-house engineers.

Is sunroom glass tempered?

Choose from clear glass or bronze tint. All our glass is tempered for safety. Tempered sunroom glass keeps you safe during accidental breakage. The glass will shatter into tiny pieces instead of dangerously sharp shards. We are proud to be the only sunroom glass manufacturer who performs this process in-house.
