Is Sudan's Energy Sector Sustainable?

Further, Sudan's energy sector is currently subsidised by the government. Government subsidies to the sector totalled \$667 million in 2019. This represents 13.5% of total government expenditures . Financial sustainability could be achieved by introducing gradual tariff adjustments.

Is solar energy a viable economic option in Sudan?

Adoption of solar energy in Sudan may be economically challenging,especially for the most poor and vulnerable population in rural areas,due to the lack of soft loans from banks and subsidization from the government.

How will a 20MW solar plant benefit Juba?

The 20MW solar facility is capable of supplying power to approximately 16,000 households in Juba,offering a significant reduction in energy prices and enhancing grid stability. The BESS will store energy from the solar plant,providing on-demand power,stabilizing the grid,and ensuring consistent renewable energy reliability.

Why is SSEC a success in South Sudan?

The success of this project is largely due to the strategic collaboration with key partners, including the South Sudan Electricity Corporation (SSEC) and the Ministry of Energy and Dams, which oversee electricity generation, transmission, and distribution across the country.

This project is located in Sudan and addresses the local issue of insufficient grid power supply by adopting an integrated "photovoltaic + energy storage" solution, providing stable and clean ...

While droughts cripple hydropower, they've accidentally boosted solar adoption. Every cloudless day becomes a battery-charging bonanza - though technicians wish they could store some ...
