What is an IP rating on a diesel generator?

These ratings help in selecting appropriate equipment for specific environments, ensuring reliability and safety. Here are a few typical IP (Ingress Protection) protection levels you might encounter with diesel generator sets:
IP23: Provides limited protection against solid foreign objects and water spray up to 60 degrees from vertical.

What are the IP protection levels for diesel generators?

Here are a few typical IP (Ingress Protection) protection levels you might encounter with diesel generator sets:
IP23: Provides limited protection against solid foreign objects and water spray up to 60 degrees from vertical.
P44: Offers protection against solid objects greater than 1 mm, as well as splashing water from any direction.

Do you carry IP55 enclosures?

We carry IP55 enclosures that demonstrate almost complete protection from particles and a good level of protection against water. All of our enclosures rigidly adhere to the guidelines, so you can count on outstanding and cost-effective enclosures. Refer to the chart below for the IP55 standard protection specifications and ratings:

What does the second digit mean in an IP55 enclosure?

The second digit indicates the extent of protection against water. We carry IP55 enclosures that demonstrate almost complete protection from particles and a good level of protection against water. All of our enclosures rigidly adhere to the guidelines, so you can count on outstanding and cost-effective enclosures.
