OverviewHistorySpecificationsComparison with other battery typesUsesRecent developmentsSee alsoThe lithium iron phosphate battery (LiFePO₄ battery) or LFP battery (lithium ferrophosphate) is a type of lithium-ion battery using lithium iron phosphate (LiFePO₄) as the cathode material, and a graphitic carbon electrode with a metallic backing as the anode. Because of their low cost, high safety, low toxicity, long cycle life and other factors, LFP batteries are finding a number o...

In Tajikistan's mountainous city of Khujand, reliable energy storage isn't just a luxury--it's a necessity. With frequent power fluctuations and growing demand for renewable integration, ...

These high-performance lithium iron phosphate (LFP) modules are designed for long cycle life, safety, and stable operation under diverse environmental conditions -- making ...

Source top-tier lithium iron phosphate solutions from an industry-leading manufacturer. Our A-grade LiFePO₄ cells and custom battery packs meet strict international certifications (UN38.3, ...
