Should the cop update the technical guidelines for waste lead-acid batteries?

In its resolution 3/9, the United Nations Environment Assembly invited the COP to consider updating the technical guidelines for the environmentally sound management (ESM) of waste lead-acid batteries. It was recommended during the OEWG-12 face-to-face meetings that the COP should decide to update those technical guidelines.

What is the purpose of a lead-acid battery regulation?

The intended effect of this regulation is to require new, modified, and reconstructed lead-acid battery manufacturing facilities to control lead emissions within the specified limits, which can be achieved through the use of the best demonstrated system of continuous emission reduction.

What are lead-acid battery standards?

The standards implement Section 111 of the Clean Air Act, and are based on the Administrator's determination that lead-acid battery manufacturing facilities contribute significantly to air pollution, which may reasonably be anticipated to endanger public health or welfare.

In its resolution 3/9, the United Nations Environment Assembly invited the COP to consider updating the technical guidelines for the environmentally sound management (ESM) of waste ...

y electrolyte. The environmentally sound disposal of waste lead-acid batteries using appropriate risk management measures and controls provides an economically viable and sustainable ...
