---

Togo is making progress in strengthening its energy infrastructure with a new solar power plant in Dapaong. Togo launches an international call for tenders for a new photovoltaic solar power ...

This document achieves this goal by providing a comprehensive overview of the state-of-the-art for wind-storage hybrid systems, particularly in distributed wind applications, to enable ...

"Modeling and optimization of hybrid hydro-solar-wind systems for green hydrogen production in Togo." International Journal of Renewable Energy Development 14, no. 4 (2025): ...

This training course provides participants with comprehensive expertise on the design, modeling, and optimization of wind-solar hybrid systems, equipping them to plan, implement, and ...

In comparison to solar energy, wind energy has only been used to pump groundwater; however, an initial exploration has shown that Togolese wind resource is not competitive compared to ...
