What is a distribution transformer?

Distribution transformers are pivotal components in electrical systems, ensuring safe and efficient power delivery to homes and businesses. These transformers play a crucial role in reducing the voltage levels of electricity generated at power plants before it reaches end-users.

What types of Transformers do you offer?

We offer a comprehensive range of transformers, including Power Transformers, Distribution Transformers, Isolation Transformers, and Instrument Transformers. Our products are sourced from reputable manufacturers and are designed to meet the highest industry standards.

Who is PowerFLOW Qatar?

Powerflow Qatar L.L.C. specializes in high-pressure tools and systems, offering a range of products including inductive load banks, which are crucial for testing power supplies. Their Froment Proofloader system effectively replicates working load conditions, ensuring rigorous testing for power systems from 1kW to many MVA.

Who makes UV transformer MV/LV prefabricated substation?

The UV Transformer MV/LV prefabricated substation is part of a comprehensive offer of products with consistent design. The PSS is a co-branded product offer covering the best of products from UV Transformer. BIOSCO design comes from Schneider Electric, France. All LT & MV electrical distribution products come from Schneider Electric, India.
