What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) offer energy continuity and protect your equipment from damages during power outages. Learn more

Which UPS system is used in data centers?

Mostly online/double-conversion UPS systems with power capacity ranging from 50kVA to 200kVA are used in data centers. These systems are connected to an inverter all the time and act as a bridge between the IT equipment and power supply.

Are battery-backed uninterruptible power supplies reliable?

Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptible power supplies (UPS) are one option to protect and keep electronic equipment operating in the event of grid power failure.

What is the global uninterruptible power supply (UPS) market size?

Global uninterruptible power supply (UPS) market size was valued at USD 8,018.79 million in 2022. The uninterruptible power supply (UPS) market industry is projected to grow from USD 8,562.46 million in 2023 to USD 16,074.96 million by 2030, exhibiting a compound annual growth rate (CAGR) of 9.42% during the forecast period (2024 - 2030).

The GenCell G5 long-duration UPS (uninterruptible power supply) provides a potentially unlimited source of 5kW of backup power for telecom, first responders and niche industrial markets.

3 days ago · At 99.9995%, Mitsubishi Electric Uninterruptible Power Supplies achieve the highest equipment reliability among all UPS suppliers, ensuring you - and your customers - are ...
