Does fluence energy have a manufacturing facility in Vietnam?

The facility boasts a projected annual manufacturing capacity of 35 GWh. Fluence Energy and ACE Engineering opens a new Automated Energy Storage Factory in Vietnam. Credits: shutterstock.com Fluence Energy has announced the opening of a new automated production facility in Bac Giang Province, Vietnam, built in collaboration with ACE Engineering.

What is a GWh energy storage factory?

This is no ordinary factory--it is an automated energy storage facility with an annual production capacity of up to 35 GWh. For the energy storage industry, this move represents both a new milestone in the strategic partnership between the two companies and a significant shift in the global energy storage manufacturing landscape.

Why should we open a new energy storage facility?

With projected annual manufacturing capacity of 35 GWh, the facility features a fully automated production process that is designed to enhance productivity and safety. We believe the opening of this facility marks a crucial milestone in meeting the increasing global demand for high-performance energy storage solutions.

What is a fluence energy storage factory?

More importantly, it employs a fully automated production process. Fluence officially refers to it as a "future-oriented factory." For the energy storage industry, increased automation not only reduces reliance on manual labor but also directly enhances consistency, safety, and product yield.
