-----  
How many countries in Latin America have 5G services?

As of March 2023, eight countries in Latin America had launched commercial 5G services. The number of 5G connections is forecast to grow steadily over the next couple of years, before accelerating in the second half of the decade as new 5G markets go live and existing networks expand to cover new areas.

Is 5G a good idea for businesses in Latin America?

There is also positive sentiment towards 5G among enterprises in Latin America. GSMA Intelligence research shows that enterprises in the region across all verticals find new technologies such as 5G, private networks, massive IoT, edge and slicing compelling to advance their digital transformation.

Why do businesses need 5G technology?

GSMA Intelligence research shows that enterprises in the region across all verticals find new technologies such as 5G, private networks, massive IoT, edge and slicing compelling to advance their digital transformation. Moreover, the level of interest in these technologies is in line with advanced 5G markets, such as the US.

Will 5G overtake 2G in 2024?

As such, 5G adoption will overtake 2G in 2024, 3G in 2026 and 4G in 2029. By 2030, 5G will account for nearly 60% of total mobile connections in Latin America. The speed of adoption reflects the high levels of consumer interest in 5G. According to a GSMA Intelligence survey, nearly two thirds of consumers in Latin America intend to upgrade to 5G.
