What Is Battery discharge? Battery Discharge During Idle Status? Explanation Discharge Curve Battery Discharge Characteristics A battery is an electrical component that is designed to store electrical charge (or in other words - electric current) within it. Whenever a load is connected to the battery, it draws current from the battery, resulting in battery discharge. Battery discharge could be understood to be a phenomenon in which the battery gets de... See more on sinovoltaics Published: Jul 7, 2015 PureVolt Solar When a solar battery charges or discharges | PureVolt Solar You might have noticed your battery is not charging or discharging as you expect, we have good news that your solar system is working exactly as expected. Below we will discuss the reasons ...

So long as the battery level exceeds its minimum state of charge, your battery will automatically discharge whenever the load exceeds the available solar radiation. The rate of discharge will ...
