When should you use emergency power off (EPO) with a UPS system?

Emergency Power Off (EPO) functionality enables an uninterruptible power supply and other related equipment such as generators to be remotely shut down in the event of a fire or building evacuation.

What is emergency power off (EPO)?

Emergency Power Off (EPO) functionality enables an uninterruptible power supply and other related equipment such as generators to be remotely shut down in the event of a fire or building evacuation. The process is known by several other terms, including Emergency Shutdown (EDS), Remote Shutdown (RSD) and Remote Emergency Power Off (REPO).

What is an uninterruptible power supply?

An uninterruptible power supply (UPS) ensures that devices such as computers, servers, and telecommunication systems continue operating even when the main power supply is interrupted. It provides not only power backup but also protection against voltage spikes, surges, and fluctuations.

What is power continuity (EPO)?

Power Continuity | UPS System. WHAT ARE EPO OPERATIONS? EPO (Emergency Power Off): this feature on UPS systems can cause many problems to the smooth running of the power protection installation. Primarily, the feature enables the UPS system to be 'made safe' in the event of an emergency.

Emergency Power Off (EPO) functionality enables an uninterruptible power supply and other related equipment such as generators to be remotely shut down in the event of a fire or ...

Nov 30, 2024 · An uninterruptible power supply (UPS) or uninterruptible power system is an electrical unit that provides power for computers, telecommunication equipment, etc. It not only ...
