What is the Big Canberra battery project?

The Big Canberra Battery project consists of a 250-megawatt,500 megawatt-hour BESS facility in Williamsdale,ACT.

How many small scale batteries will be delivered to Canberra?

Additional to the delivery of the BESS facility,14smaller scale batteries will be delivered to service government sites across Canberra,as well as medium-sized neighbourhood batteries to support battery storage on the distribution network.

Will big battery power a third of Canberra households in 2025?

Canberra Times: ground breaking ceremony,plugging in profits from a big battery. ITP Renewables was engaged by ECU Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system,which will begin powering one-third of Canberra households from 2025.

Where is the first Megapack battery storage under development?

The first Megapack battery storage under development at the Shanghai Megafactoryproduction line. Credit: Courtesy of Tesla,Inc. (TSLA). In 2024,Tesla's vehicle production dropped compared to 2023 but the company's sustainable energy generation and battery storage business grew exponentially.

Mar 27, 2025 · The first Chinese-made Tesla Megapack batteries are on their way to Australia, as the US brand maintains its dominance over battery storage market.
