Does Lithuania have a 5G network?

Having achieved coverage throughout the country in a record short time, Lithuania has set a new standard for the deployment of 5G communication worldwide and has strengthened its position on the global stage.

How did Telia Lietuva achieve a 5G network?

2021-2023 During the period, Telia Lietuva successfully completed the modernization of its network using the most advanced Ericsson Radio Access Network (RAN) equipment. This gave Telia the opportunity to create an advanced 5G network at 3,5 GHz and 700 MHz frequencies, ensuring high-speed data availability throughout Lithuania.

Is 5G a success story in Lithuania?

The development of 5G in Lithuania can be called a success story. After the negotiations on 5G frequencies, Lithuania was the last European country to join the 5G wave, and the country's authorities gave the green light for the official start only in the fall of last year.

What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.
