Spoiler: Yes, it can--sort of. The idea of feeding energy storage back to the grid isn't sci-fi anymore. In fact, it's reshaping how we manage electricity globally. Let's unpack this ...

So-called "grid-interactive" datacenters use battery energy storage systems (BESS), typically part of uninterruptible power supplies (UPS), to supply electricity back to the ...

I see many owners fear the grid-tie process. Rules look hard. I keep it simple and safe. Grid-tied solar sends extra AC power back through a bi-directional meter. The grid-tied inverter matches ...
