What is a circuit breaker for a winch?

A circuit breaker for a winch is a device that protects the electrical system from overload. When power comes into the circuit, it automatically goes to each device in turn. It shuts off if it senses an overload. This protects the winch and any other devices connected to it from getting damaged in case of an electrical emergency.

What types of winches does fixator offer?

FIXATOR offers a wide range of electric and manual winches for lifting equipment: MOTRIX and LM wire-rope winches can be used in the Building, Industry, Elevator sectors (for transporting cabins inside shafts, lifting guide rails, fitting out shafts ) and Wind Power (maintenance work), on an unlimited working height.

What is a fixator manual winch?

Fixator manual winches for lifting equipment or people. Lifting capacities from 0 to 400 kg. With lifting capacities from 90 kg (220 lb) to 1,000 kg (2,200 lb), unlimited heights and lifting needs in all sectors of activity: Elevator, Building, Industry, Infrastructure, Sport and Entertainment, up to design your own lifting solution.

What are motrix winches?

MOTRIX winches are electric cable winches allowing you to lift and pull material ranging from 750 kg to 1500 kg without working height limitation. We also offer lifting solutions in the entertainment and sports industry.
