What is Xiaomi smart inverter dehumidifier?

The Xiaomi Smart Inverter Dehumidifier features dual inverter technology, a Panasonic twin rotary inverter compressor and a DC inverter motor for double the power and quick dehumidification. The dehumidifier effectively covers 60m² in a single room and can be conveniently moved from room to room thanks to caster wheels.

How does a dual inverter dehumidifier work?

Thanks to dual inverter technology, the dehumidifier automatically adjusts the rotor speed to address high energy consumption caused by the frequent cycling that occurs with fixed-frequency dehumidifiers. *0.984kWh power consumed per 8 hours of continuous use in sleep mode.

What are the benefits of dual inverter technology?

With dual inverter technology combined with features such as soundproofing and vibration reduction, operation noise is significantly reduced. In sleep mode, the noise is comparable to the sound produced when flipping through a book. The automatic screen-off feature reduces light pollution, ensuring uninterrupted comfort.
