What is energy in Yemen?

Energy in Yemen describes energy and electricity production, consumption and import in Yemen. Yemen is net energy exporter. Primary energy use in Yemen was 87 TWh and 4 TWh/million people in 2008 and 88 TWh (4 TWh/M) in 2009.

How will a stable energy base support economic growth in Yemen?

The objective, he said, is to establish a stable energy base that supports economic growth and attracts new investment to Yemen's electricity sector through long-term partnerships between Yemeni institutions and international private-sector partners.

Is Yemen an energy exporter?

Yemen is net energy exporter. Primary energy use in Yemen was 87 TWh and 4 TWh/million people in 2008 and 88 TWh (4 TWh/M) in 2009. According to the World Bank, Yemen has the lowest level of electricity connection in the Middle East, with only 40% of the population having access to electricity. Rural areas are particularly badly affected.

How will a new energy project impact Yemen?

Together, the projects will deliver clean and stable electricity to more than one million homes and facilities, marking the largest transformation of its kind in Yemen's energy sector. They will also reduce hundreds of thousands of tonnes of emissions annually and lower dependence on costly fuel.
